

Reviewed professional resource - AmplifyHub Practical Resource Library

1. Complete one real practice example before adding multiple rows. This reveals unclear fields and prevents the worksheet from becoming busywork.
2. Use observable facts and your own behaviour rather than assumptions about a prospect, interviewer, or colleague. Leave a field blank when you do not know.
3. Write short, decision-ready notes: what happened, what it means, and the next action. Avoid long diary entries that are difficult to review.
4. Review the completed sheet on a fixed cadence and choose one improvement priority. Do not change several behaviours at once.
5. Store only business-appropriate information and remove personal identifiers that are not required for learning or planning.

Quality-control review

Review point	Professional standard	Warning sign
Evidence	The trigger or fit signal has a named public business source.	A vague assumption is presented as researched fact.
Hypothesis	The possible problem is framed as a question the prospect can correct.	The message claims to know internal conditions without evidence.
Fit	The account and role plausibly connect to the problem you solve.	Targeting is based only on job title or company size.
Privacy	Notes contain only necessary business-level information.	Personal, sensitive, or unrelated details are collected.

Evidence and improvement signals

- Track the percentage of researched hypotheses the prospect confirms, corrects, or rejects.
- Review sources for recency and distinguish company facts from your interpretation.
- Measure conversation quality by relevance, not by the amount of information collected.
- Update your ICP when repeated evidence shows a segment is a poor fit.

Worked example

Fit 2 (matches ICP), Trigger 2 (public driver-hiring post), Need 1 (likely but unconfirmed), Timing 1 (unknown), Role 2 (ops lead is reachable) = 8/10. A prospect scoring 3/10 goes to the bottom of the list, not the top.

Safe-practice note

Score on observable business criteria only - never on personal or protected characteristics. Qualification helps you focus and disqualify respectfully; it is not a reason to treat lower scores rudely.
