

Roleplay Scorecard

WORKSHEET | SKILL: IMPROVEMENT | DIFFICULTY: INTERMEDIATE | EST. 10 MIN

Reviewed professional resource - AmplifyHub Practical Resource Library

Overview

A scorecard for rating a practice roleplay across clarity, relevance, listening, objection handling, and next step - so feedback is specific and you can track improvement over time.

Learning objectives

- Rate a roleplay on five concrete skills
- Give yourself one specific strength and one fix
- Track scores across sessions
- Choose a single focus for next time

How to score

After a roleplay (with the AI Coach or a peer), rate each skill 1-5 and write one sentence of evidence. Pick exactly one thing to keep and one to change. Focus on one change per session.

Scorecard

Skill	Score (1-5)	Evidence / note
Clarity of opener		
Relevance to prospect		
Listening & follow-up		
Objection handling		
Clear next step		

Professional standard

Professional improvement uses observable criteria, a consistent scoring method, and one focused experiment at a time. Scores support coaching decisions; they are not labels of talent or potential.

Professional workflow

1. Complete one real practice example before adding multiple rows. This reveals unclear fields and prevents the worksheet from becoming busywork.
2. Use observable facts and your own behaviour rather than assumptions about a prospect, interviewer, or colleague. Leave a field blank when you do not know.
3. Write short, decision-ready notes: what happened, what it means, and the next action. Avoid long diary entries that are difficult to review.
4. Review the completed sheet on a fixed cadence and choose one improvement priority. Do not change several behaviours at once.
5. Store only business-appropriate information and remove personal identifiers that

are not required for learning or planning.

Quality-control review

Review point	Professional standard	Warning sign
Criteria	Each score describes behaviour that a reviewer can hear or see.	Labels such as good or confident are used without evidence.
Consistency	The same scale and conditions are used across comparable sessions.	The standard changes according to mood or outcome.
Feedback	Notes name one strength, one priority, and one specific next action.	A long list of faults leaves no practical focus.
Retest	The chosen behaviour is practised and reviewed again.	Scores are recorded but never used to guide practice.

Evidence and improvement signals

- Use trend direction across multiple sessions instead of chasing a perfect score.
- Separate delivery, listening, relevance, and next-step skills so feedback is diagnostic.
- Invite a second reviewer periodically to check scoring consistency.
- Promote a new focus only after the current behaviour is reliably demonstrated.

Worked example

Clarity 4 ("opener was tight"), Relevance 3 ("problem line was generic"), Listening 2 ("talked over the answer"), Objections 3, Next step 4. Keep: tight opener. Change next time: pause and let the prospect finish before responding.

Safe-practice note

Score to learn, not to judge yourself harshly. Use it on practice roleplays, not to critique real prospects. One honest fix per session beats a long list you cannot act on.
